

# Package ‘AffymetrixDataTestFiles’

October 8, 2013

**Version** 0.1.6

**Date** 2008-04-08

**Title** Affymetrix data files (CEL, CDF, CHP, EXP, PSI) for testing

**Author** Henrik Bengtsson, James Bullard, Kasper Daniel Hansen

**Description** This package contains annotation data files and sample data files of Affymetrix file formats. The files originate from the Affymetrix’ Fusion SDK distribution.

**Depends** R (>= 2.5.0)

**Maintainer** Henrik Bengtsson <hb@stat.berkeley.edu>

**License** LGPL-2.1

**LazyLoad** yes

**biocViews** Microarray, OneChannel, AnnotationData, ExperimentData

AffymetrixDataTestFiles-package  
*Package AffymetrixDataTestFiles*

---

## Description

This package contains annotation data files and sample data files of Affymetrix file formats. The files originate from the Affymetrix’ Fusion SDK distribution. This package contains only data files.

**Requirements**

None.

**Installation**

To install this package, see <http://www.bioconductor.org/>.

**Location of data files**

Data files are located in two different directory tree depending if they are annotation data files or sample data files. The roots of these two directory structures are:

```
system.file("annotationData", package="AffymetrixDataTestFiles")
system.file("rawData", package="AffymetrixDataTestFiles")
```

Where applicable, ASCII, XDA, and Calvin files are separated in different subdirectories for easy access to either type.

Directory structure:

```
annotationData/
  chipTypes/
    HG-Focus/
      +-HG-Focus.PSI
      3.ASCII/
        +-HG-Focus.CDF
