

Package ‘microRNAome’

May 9, 2024

Version 1.26.0

Date 2022-11-07

Title SummarizedExperiment for the microRNAome project

Description This package provides a SummarizedExperiment object of read counts for microRNAs across tissues, cell-types, and cancer cell-lines. The read count matrix was prepared and provided by the author of the study: Towards the human cellular microRNAome.

Author Matthew N. McCall <mccallm@gmail.com>, Marc K. Halushka <mhalush1@jhmi.edu>, Arun H. Patil <arun26feb@gmail.com>

Maintainer Matthew N. McCall <mccallm@gmail.com>

Depends R (>= 3.4), SummarizedExperiment

microRNAome

MicroRNAome Data

Description

Read counts per miRNA for the microRNAome collection of RNA-Seq experiments

Usage

```
data("microRNAome")
```

Format

SummarizedExperiment

Details

Small RNA-seq data on 2406 samples from the Sequence Read Archive (SRA) processed using the miRge3 pipeline.

Source

Read count matrix prepared and provided by authors of the study
