)

Maintainer Samuel Wieczorek <samuel.wieczorek@cea.fr>

Description This package provides a GUI interface for the DAPAR package. The package Prostar (Proteomics statistical analysis with R) is a Bioconductor distributed R package which provides all the necessary functions to analyze quantitative data from label-free proteomics experiments. Contrarily to most other similar R packages, it is endowed with rich and user-friendly graphical interfaces, so that no programming skill is required.

biocViews Proteomics, MassSpectrometry, Normalization, Preprocessing, Software, GUI

License Artistic-2.0

Depends R (>= 4.3.0)

Suggests BiocStyle, BiocManager, testthat

Imports DAPAR (>= 1.34.6), DAPARdata (>= 1.27.3), rhandsontable, data.table, shiny, shinyBS, shinyAce, highcharter, htmlwidgets, webshot, shinythemes, later, shinycssloaders, future, promises, shinyjqui, tibble, ggplot2, gplots, shinyjs, vioplot, shinyTree, knitr, colourpicker, gtools, XML, R.utils, RColorBrewer, DT, shinyWidgets, sass, rclipboard, markdown

NeedsCompilation no

RoxygenNote 7.2.3

Encoding UTF-8

R topics documented:

BuildColorStyles	2
getDataForExprs	3
Prostar	3

Index	4
--------------	----------

BuildColorStyles	xxxx
------------------	------

Description

xxxx

Usage

BuildColorStyles(obj)

Arguments

obj	xx
-----	----

getDataForExprs	xxxx
-----------------	------

Description

xxxx

Usage

getDataForExprs(obj, digits = NULL)

Arguments

obj	xx
digits	xxx

Prostar	<i>Prostar</i>
---------	----------------

Description

Prostar

Usage

Prostar()

Value

A new window in the default internet browser

Author(s)

Samuel Wieczorek

Examples

```
if (interactive()) {
  Prostar()
}
```
